## Experience

**New Era University, Student**
*January 2024 - Present*
Student

## Education

**New Era University**
*Bachelor of Science in Information Technology, January 2023 - Present*

## Skills

*JavaScript, PHP, HTML, CSS, Java, SQL*

## Projects

**LaCasa HOTEL**
As a second-year IT student at New Era University, I developed LaCasa HOTEL as my first full-stack project. This web application showcases my skills in front-end and back-end development, featuring a functional booking system with user authentication, database connectivity, and a responsive design tailored for hotel management. This project demonstrates my ability to design, implement, and integrate dynamic features for real-world applications.
